Orientation HW

1. Set up the environment according to the **Environment Setup Guide** and take a screenshot of your successful setup.

2. Create a new Console App project on Visual Studio

    a. Print out "Hello World";

    b. Write a function/method to reverse a string, ex "Hello" → "olleH"

Assignment Submission Instructions

File naming conventions: Week?Day? - Firstname Lastname

    Example: Week1Day1 - Rachel Liu

Submission should be a single .zip file that contains the following:

- The solution folder containing all your projects
- A PDF writeup containing the following information:
    - Your answers to the short answer questions
    - Whenever possible, please include screenshots of your code and outputs
    - A brief description of any challenges you encountered (if any)
- Any other files you wish to include
